Trains and extra engines must keep fifteen (15) minutes apart when descending grades between Beaumont and Redlands Junction, and Beaumont and Palm Springs.

All freight trains *ascending* grades between Rimlon and Loma Linda, inclusive, will *take siding* for opposing freight trains.

In addition to tests made at Terminals, air brakes on all trains must invariably be tested from rear of train at Colton, Beaumont and Palm Springs.

East-bound freight trains will stop at Cabazon, Palm Springs and Dry Camp and west-bound freight trains at Ordway, where trainmen will make careful examination of wheels under all cars in train.

Registering Stations: Pomona, Ontario, Colton, Redlands Junction, Beaumont, Palm Springs, Indio, Rimlon and Edom (two latter for helper engines only).

All west-bound trains have absolute right over all east-bound trains of the same or inferior class. See Rule 81. Exception: Train No. 244 has right over Nos. 249 and 251.

LOS ANGELES DIVISION: Indio, Redlands Junction and Pomona.

All regular passenger trains will stop at Central Ave. (on signal), Grand Ave. and North Beach Bath House, Santa Monica.
Regular freight service to Soldiers Home on Tuesdays and Fridays only.
All trains running via Soldiers Home loop will leave a brakeman at Home Junction to throw switches and advise other trains.
On arriving at Santa Monica, trains running through to Port Los Angeles will run up to the passenger station on the bluff, then back out and proceed to Port Los Angeles. Trains following will govern themselves accordingly.
Trains from Port Los Angeles when leaving Santa Monica, will start from regular passenger station on the bluff. Trainmen must use great care in backing up trains to this station.
Trains and engines will not exceed a speed of twelve miles per hour on Port Los Angeles Wharf.
All trains and engines must come to a full stop and send flagman ahead before proceeding through Santa Monica tunnel, between 6 P. M. and 6 A. M., when tunnel flagman is off duty.

Registering Stations: Clement Junc., Santa Monica Junction, Santa Monica and Port Los Angeles.

All west-bound trains have absolute right over all east-bound trains of the same or inferior class. See Rule 81.

LOS ANGELES DIVISION: Florence, Long Beach, San Pedro and Point Fermin.

Riverside motor trains have right over Redlands motor trains going in same direction between First Street Junction and San Bernardino.

All passenger trains will stop on signal at Bolan.

Motor trains will stop on signal at Smith, Idlewild, Victoria, Tippecanoe, Race Track, Mill School-house, Brinkmyer, Mill Street, Urbita, Bethune, Grand Terrace, Iowa Avenue and Chicago Avenue.

West-bound motor trains will wait indefinitely at Colton for the arrival of the east-bound motor train scheduled to meet them there, as indicated in full-faced type. Nos. 200 and 214 have right over all west-bound motor trains.

Registering Stations: Market Street, Riverside Junction, Riverside, Colton, San Bernardino, Redlands Junction, Motor Junction, Redlands and Crafton.

All west-bound trains have absolute right over all east-bound trains of the same or inferior class. See Rule 81. Exceptions: Train No. 306 has right over Train No. 309. No. 16 has right over No. 309.

LOS ANGELES DIVISION: Crafton, Redlands Junction, San Bernardino and Riverside.

★ FOOT-NOTE.—Nos. 8 and 10 when coming into Los Angeles will run via Mission Junction (time at Mission Junction 6:39 A. M. and 12:25 P. M. respectively.) All west-bound trains are superior to all east-bound trains of the same or inferior class. See Rule 81.

SPECIAL RULES.

Standard Clocks, as per rule 3, are located at Los Angeles, River Station, Colton, Beaumont, Indio and Yuma. **All trains must procure orders or Clearance Cards before leaving terminals.**

INTERLOCKING SIGNAL TOWERS.

TOWER No. 1.—Crossing of Southern California and S. P., L. A. & S. L. Railways, 1.9 miles east of Los Angeles. (Engineers of west-bound trains going to River Station will blow one long and four short blasts of the whistle as a notice to towerman to throw switch at Mission Junction.)

TOWER No. 2.—Crossing of Southern California Railway, .9 mile east of Vernondale.

TOWER No. 3.—Crossing of Southern California Railway, at Los Nietos. (Engineers of trains wishing to take siding will sound one long and four short blasts of the whistle.)

TOWER No. 4.—Crossing of Southern California Railway, .5 mile east of Tustin Junction.

TOWER No. 5.—Crossing of Southern California Railway, .3 mile east of Marlboro.

TOWER No. 6.—Crossing of Southern California Railway, at west end of Colton yard. (East-bound trains desiring coach track will sound one long and one short blast of the whistle; for No. 1 track, one long and four short blasts; for No. 2 track, three short and one long blasts, and for Riverside branch two long and one short blasts.)

TOWER No. 7.—Crossing of Southern California Railway at Arcadia.

TOWER No. 8.—At Shorb. (Engineers of trains going on Pasadena Branch will blow one long and four short blasts of the whistle, for the information of towerman. Going on Duarte Branch, four short and one long blast of the whistle. For passing track, one long and one short blast; for middle track, two long and one short, and for house track, three short and one long blast.)

TOWER No. 9.—Crossing of Southern California Railway, .7 mile west of Orange Center.

TOWER No. 10.—Crossing of Southern California Railway at Riverside Junction. (Engineers of trains going to Riverside freight yard will blow one long and four short blasts of the whistle for the information of towerman.)

TOWER No. 11.—At Naud Junction. (Engineers of trains running via Mission Junction will sound four short blasts of the whistle for information of towerman.)

TOWER No. 12.—At River Station. (Engineers will sound one long blast of whistle for main line; five short blasts for cross-overs; one long and one short blast for side movements, and three short and one long blasts for Hotel tracks, or new freight house tracks.)

TOWER No. 13.—At Florence. (Engineers of east-bound trains going on Santa Ana branch will sound one long and four short blasts of whistle for information of towerman. Engineers of west-bound trains wishing to take siding will sound one long and one short blast of the whistle.)

TOWER No. 14.—At Pomona. (Trains desiring Chino or Covina branch will sound one long and four short blasts of whistle; for Passing Track, one long and one short blast; for Storage Track and Winery spur, two long and one short blasts; for House Track, three short and one long blasts.)

TOWER No. 15.—Crossing of the San Pedro, Los Angeles and Salt Lake Railway, on Chino branch .2 mile west of Ontario.

TOWER No. 16.—Crossing of the San Pedro, Los Angeles and Salt Lake Railway on Chino branch 1.10 miles east of Pomona.

When a train which has been given the semaphores does not wish to use the crossing, one short followed by one long blast of the whistle should be blown for information of towerman.

LOS ANGELES YARD: Los Angeles and River Station.

TOWARD SAN FRANCISCO.

All trains will approach Fourth Street with great care and know that crossing is clear before passing over. When flagman is on duty, they will not proceed without signal from him that track is unobstructed.

Registering Stations: River Station and Los Angeles.

All west-bound trains are superior to all east-bound trains of the same or inferior class. See Rule 81.

Automatic block signals provided with overlaps are located as follows:

Los Angeles between first crossing Los Angeles River and River Station.

Los Angeles, between River Station and Naud Junction.

Los Angeles, between Arcade Depot and Clement Junction.

Los Angeles, between Naud Junction and Tower No. 1, on west-bound track.

Between Shorb and end of double track east of Los Angeles River on west-bound track, and from east end of Aurant yard to Shorb on east-bound track.

Santa Monica, from 99-steps to west end of Material Yard.

Block signals, between Naud Junction and Arcade Depot are "manually controlled."

The limits of these blocks when not indicated by signals will be shown by a sign reading "Block Signal Limit," placed on the engineer's side of the track.

On east-bound track just west of entrance to River Station yard there is a 2-arm signal. The top arm is a block signal and when clear, indicates that switches are set for main line and block is unoccupied. Lower arm permits freight trains to enter the yard and is cleared by switch tender after lining up switches for the yard by pressing one of the buttons attached to the short posts opposite these switches.

Trains will be governed by these signals in accordance with standard rules. (See pages 92, 93, 94, 95, 96 and 97.)

Referring to Rule No. 40, page 94, covering observance automatic block signals; when a train is stopped by block signal between Shorb and end of double track east of second crossing Los Angeles River, it will wait two minutes after flagman has gone ahead, before proceeding out of block cautiously. Between second crossing Los Angeles River and Clement Junction in Los Angeles, flagman need not be sent ahead, and trains may run by signal at danger after waiting one minute for clearance.

Trainmen must not depend upon the Block System to protect their trains; but wherever necessary, must see that the train is protected by flag, as per rule 99, as supplemented; to which particular attention is called.

Light engines bound west, when running extra, will take siding for east-bound extras.

Trains must not be run from the *instant of their departure* from any station to the *instant of their arrival at the next station* in less time than given in the column headed "*Minimum running time between stations.*"

No train will exceed a speed of fifteen miles per hour over any railroad crossing, motor and electric crossings included.

Rule No. 99 reads: "When a train stops, or is delayed, under circumstances in which it may be overtaken by another train, the flagman must go back immediately with stop signals a sufficient distance to insure full protection. When recalled he may return to his train, first placing two torpedoes on the rail when conditions require it. The front of a train must be protected in the same way when necessary by the front brakeman; if the front brakeman is not available, the fireman must act in his place."

The foregoing rule is hereby supplemented as follows:

(a) Columns to the right and left of station names on the face of this time-card contain figures denoting the distance a flagman is required to go back to insure full protection under the above rule. At the distance denoted by the number of telegraph poles in column headed "Danger Point" the flagman will place one torpedo on the rail; he will then continue to go back to the number of telegraph poles denoted by figures in column headed "Caution Point" where he will place two torpedoes on the rail not more than 200 feet apart; he will then return to the "Danger" point and remain there until recalled by the whistle of the engine of his train, unless a passenger train is due or expected within 5 minutes, in which case he will remain until it arrives. On returning to his train he will remove the torpedo placed at the "Danger" point, but the two placed at the "Caution" point must be left undisturbed. When there is not a clear view for at least one-half mile to the rear, train should be moved forward a sufficient distance to insure safety before the flagman is recalled.

(b) When a train is detained more than 3 minutes at any of its usual stops between terminals, it must be protected as above prescribed.

(c) When a train stops at any unusual place the engineman will be held responsible for failure to immediately sound his whistle as a signal to the flagman to go back and protect the train.

(d) Should the speed of a train be reduced, and its rear thereby endangered, making it necessary to check the speed of a following train before a flagman can get off, lighted red fusees will be thrown on the track at intervals to insure absolute safety to the leading train.
